

Significant award further enhances MEDIFACTS' position as one of the top cardiac safety services providers

March 26, 2008 ROCKVILLE, MD – (USA) / LANGENFELD, GERMANY / SHANGHAI, CHINA – MEDIFACTS INTERNATIONAL, INC. a leading provider of noninvasive cardiac safety services, has announced the award of a 2-year study program worth approximately of \$4.3 million dollars. The award – by a major Japanese pharmaceutical company - represents a number of studies comprising a substantial registration program to run over approximately 2 years.

MEDIFACTS will provide comprehensive global cardiac efficacy services including provision of equipment for digital collection and centralization of data that will be transferred to MEDIFACTS for processing and analysis. MEDIFACTS' proprietary web-based platform, WebHeart® will enable the efficient management of the data, and provides a fully-digital environment for manual measurement and overread of ECGs and other cardiac safety and efficacy data while exceeding regulatory guidance and technical standards.

Michael Woehler, MEDIFACTS' President and Chief Executive Officer said: "We are delighted to be supporting this key sponsor program, a crucial investment for our sponsor, another validation of the tremendous quality of MEDIFACTS' global services, and another vote of long term confidence in the Company by the sponsor community. MEDIFACTS and our WebHeart® platform continue to set the global standard in cardiac safety data collection, management and submission, and we continue to consolidate our position as one of the top 3 global cardiac safety businesses."

#### About MEDIFACTS

MEDIFACTS is a global leader providing quality Cardiac Safety and Efficacy services to pharmaceutical, biotech and medical device companies that are developing therapeutic drugs and products.

MEDIFACTS provides ECG and Holter services as well as automated office, home, and ambulatory blood pressure monitoring services from offices in the US, Europe, and Asia.

Driven by best-in-class Science, Technology, and Quality System Management, MEDIFACTS' Core Lab has maintained strong growth and the company is now established as one of the top 3 providers in this industry. MEDIFACTS International's scientific expertise, proprietary WebHeart® technology, global presence and recognized quality leadership mean the company is increasingly selected as the partner of choice by pharmaceutical and biotech drug developers.

WebHeart® is a proprietary, global, Web-based platform that offers a complete solution to acquiring, displaying, measuring, and managing Cardiac Safety data in clinical trials. This system allows for real-time access to ECG and Ambulatory Blood Pressure data. Because no actual programming is needed, the time and cost of both study setup and data submission are dramatically reduced. All ECG data can be converted into an XML format that meets FDA requirements and protocol setups are easily configured and expanded to accommodate additional information.
