

Modified Polymer Components
Custom Plastic Components For Medical Device OEMs

242 HUMBOLDT COURT, SUNNYVALE, CA 94089-1315

FOR IMMEDIATE RELEASE

MODIFIED POLYMER COMPONENTS PARTNERS WITH AMPERSAND

Sunnyvale, CA- August 29, 2011 – Modified Polymer Components (MPC) announced that it has partnered with Ampersand Capital Partners (Ampersand). Proceeds from the transaction will be used to support the company’s expansion strategy. Terms of the transaction were not disclosed.

MPC specializes in the design, rapid prototyping and manufacture of reliable, highly precise polymer components for major medical device original equipment manufacturers (OEMs). Since its founding in 1989, the Company has grown to over 150 employees and served more than 1,500 customers. Leveraging its proprietary heating system for molding and modifying plastics, MPC has established a market reputation for manufacturing extremely complex and precise medical device components. The company’s engineers partner with medical device OEMs early in the design and prototype process, enabling the identification and resolution of potential design problems before production begins.

According to Mike Taylor, President and CEO of MPC, “We are pleased to partner with the Ampersand team to work with us in expanding our capabilities and enhancing the value that we bring to our customers. Ampersand’s extensive experience in medical device outsourcing made them an ideal choice to be our financial partner. The opportunity to collaborate with Ampersand’s other device outsourcing portfolio companies further enhances the potential of this partnership.”

“We are excited about the opportunity to work with Mike Taylor and MPC’s exceptional management team” said Jared Bartok, Partner of Ampersand. “MPC is an ideal fit with our strategy of providing growth capital to innovative, middle market companies in the health care sector. We look forward to working with the Company to continue its impressive record of growth and achievement.”

About MPC

MPC is a privately held medical device company headquartered in Sunnyvale, CA, USA. MPC provides manufacturing, research, development, and technical support for polymer-based medical device components. For more information: www.modifiedpolymer.com

About Ampersand

Ampersand is a middle market private equity firm with a focus in two core Sectors: Healthcare and Industrial. Within this core, Ampersand targets growth equity opportunities where it can be the first institutional investor. Ampersand’s unique blend of private equity and operating skills positions the firm to build value and drive long-term performance by working in support of the portfolio company management teams.
